

MSEAL

MITRA RF TUBE SEALER

m-seal-RF Tube Sealer is a compact instrument to seal the blood bag tubes by radio-frequency sealing system. Special RF electrode design eliminates hemolysis of blood in the tube while RF sealing takes place. Easy separation of tube is done. RF sealing can be achieved in short time.

... extra features in Mitra RF Tube Sealer...

- m-seal is bench top RF tube sealer and has a heavy duty construction.
- It is light weight, portable and has a compact design.
- Splash guard, provided to protect from liquid splashing.
- Automatic triggering of sealing with the help of sensor.
- Magmatic electrode & head cover for easy cleaning.
- LED indicator lamps for system ready, sealing.
- One touch sealing activation.
- Automatic sensing system.
- RF output frequency is 40.68 Mhz.
- Short sealing time.
- Easy separation of tube system.
- No compressed air requirement.
- No warm up time.
- m-seal has user friendly, ergonomical design.
- Carry box for the easy transportation.

**Also available
battery operated**

... extra benefits

- m-seal easily creates hermetic snap-apart seals and incorporates a user friendly.
- Minimal efforts required to seal the tubing.
- Meets high output demands.
- Adapts to different tube sizes.
- Tube is easily pulled apart to separate seal ends.
- Front electrode and head cover can be easily removed for cleaning.
- m-seal with sophisticated sensing system automatically adapt sealing time required for different tube sizes and thicknesses.

{ specifications }

Input power supply	220V AC 50Hz 5A
Sealing suitability/applicability	Blood Bag tube
Sealing time	0.5-2 Sec.
RF output frequency	40.68 Mhz
Cable	3 core wire with plug and socket
Length of cable	2 meters
Inbuilt fuse	4A main supply AC
Mechanical size & weight	W=3.4" H=8.2" L=12.9", wt= 4kg
